TOWN MEETING WARRANT

STATE OF NEW HAMPSHIRE

*To the inhabitants of the Town of Littleton, in said State,
qualified to vote in town affairs:*

You are hereby notified to meet at the Town Hall and Police Court Room in the Town Building, on the 14th day of March next, being the second Tuesday of March, at eight o'clock in the forenoon, to act upon the following subjects:—

ARTICLE 1. To choose a Town Clerk, one Selectman for the term of one year to fill the un-expired term of Fred E. Richardson, deceased, one Selectman for the term of three years, a Town Treasurer, an Auditor, a Collector of Taxes, an Overseer of the Poor, an Agent to prosecute violations of the liquor law, three members of the Board of Trustees of the Public Library, each for the term of three years, one Trustee of Trust Funds and a Constable.

ARTICLE 2. To raise and appropriate such sums of money as may be necessary for the laying out, construction and repairing of highways and bridges, for town officers' salaries, for town officers' expenses, for election and registration expenses, for Municipal Court expenses, for town building maintenance, for the police department, for the health department, for vital statistics, for the Community Center, for miscellaneous expenses, for street lighting, for the Littleton Hospital, for the public library, for town poor, for Memorial Day, for band concerts, for water troughs, for cemeteries, for damages and legal expenses, for payment of the town debt and interest, for the Community Nurse, for the community garden and for all other town charges.

ARTICLE 3. To see what action the Town will take for the purpose of securing State aid for construction of high-

ways in this town under the provisions of an act to provide State aid and for the expenditure of other public moneys in the construction of highways throughout the State in accordance with Chapter 84 of the Laws of New Hampshire.

ARTICLE 4. To see if the Town will authorize the selectmen to administer or dispose of any real estate acquired by the Town through tax collector's deeds.

ARTICLE 5. To see if the Town will vote to instruct its Selectmen to appoint a Collector of Taxes, in accordance with Section 41, Chapter 47 of the Laws of New Hampshire.

ARTICLE 6. To see if the Town will vote to instruct its Selectmen to appoint an Overseer of the Poor, in accordance with Section 41, Chapter 47 of the Laws of New Hampshire.

ARTICLE 7. To see if the Town will vote to elect its highway agents by vote of the Town, rather than having them appointed by its Selectmen.

ARTICLE 8. To see if the Town will authorize the Selectmen to borrow money from time to time during the current year, on the credit of the Town, to pay current indebtedness, in anticipation of taxes.

ARTICLE 9. To see what action the Town will take with reference to the matter of authorizing the Selectmen to give any druggist doing business in this town, a prescription permit to sell pure spirituous and malt liquor for medicinal, sacramental, mechanical and scientific purposes, as provided in Chapter 147 of the Laws of the State of New Hampshire.

ARTICLE 10. To hear the reports of agents, auditors, committees or officers heretofore chosen and pass any vote relating thereto.

ARTICLE 11. To choose any other necessary Town officers for the year ensuing, and to choose or elect any agents or committees which may be necessary to carry into effect any vote that may be passed under this warrant.

ARTICLE 12. To transact any other business that may legally come before the meeting.

Given under our hands and seal this 25th day of February, 1933.

W. H. SHEA,
C. W. WOODS,
F. O. NOURSE,
Selectmen of Littleton.

 124

The statement above only includes the police affairs that actually were brought into Court. Numerous matters, principally domestic of one kind and another, have been disposed of by the Justice and police officers without Court action, and have not been made a part of the Court Records. There have been many suspensions of fines, the costs being paid from Court funds, because of the inability to pay, due to unemployment and the general economic conditions. Had the orders been enforced, it would have added materially to the cost of care and support of wives and children. In a very large number of the "Unlicensed Dogs" cases, the costs were paid from the Court funds, but a large sum was recovered to the Town in license fees.

HARRY L. HEALD,
Justice.

WATER AND LIGHT DEPARTMENT

Preface to the Report of F. E. Green, Treasurer of The Water and Light Department

To the Water and Light Commissioners and the Citizens of
Littleton:

Referring to my financial report, I think it will be the more understandable to the average citizen if a little digest of conditions is set forth.

One of the first things you will note is the reduction of accounts receivable, in the electric department. Last year we carried over \$15,628.32; and this year we are showing, as receivable, \$9,267.53, or in other words, a reduction of \$5,360.79. This was brought about by adopting a system of reading and billing all meters each month and making a ten, instead of a twenty day limit on the discount period. Were conditions at all normal, I would be able to show a much closer collection even than the above. The reduction in rates also enters here, as the amount per consumer has been very materially reduced, and were it not for the fact that many new customers have been added, and much lost energy picked up to take the place of the difference in price between the present and the old schedule of rates, a much smaller amount would show in accounts receivable.

One of the heaviest leaks and abuses was in the old flat rate for hall lights and other purposes. This practice has been discontinued and a direct saving has been made here of 25,995 Kwh per year, which, figured at a value of .04½ cents per Kwh, would amount to \$1,169.78. No flat rates are now in operation: we are practically 100% metered.

Among the various savings which have been made during the past year, the following are the most outstanding. We have picked up, and metered, in heretofore unaccounted-for current 85,939 Kwh, which, valued at $.04\frac{1}{2}$ cents per Kwh, would amount to

Abolition of the practice of mailing receipted bills	\$3,867.25
Cash discounts taken	240.00
Discontinuance of the practice of giving away fuse plugs	1,065.44
	68.58

Making a total saving, on these four items, of \$5,241.27 in operating expenses.

It is costing this department right around \$40.00 per month in postage and envelopes, to mail out bills. Before the abolition of mailing receipts, nearly half of the remittances received required return postage. Now, practically all payments are brought to the office personally, or, if mailed, only the stubs are enclosed. On a busy day we handle at the desk an average of one customer every four minutes.

The department is in a good, healthy condition, and may be kept as a source of revenue to the town, while at the same time maintaining a lower scale of rates than any nearby town is enjoying. In order to do this, it will be necessary to charge rates adequate to take care of operating and maintaining expenses, and also a depreciation charge sufficient to replace worn and obsolete equipment.

A reduction of water rates as of January first 1933, will be made as follows: \$2.00 per sink for the first sink and \$1.00 per flush closet for the first closet. Bills have already been sent out and some have been paid, but nevertheless this cut will be retroactive as of January 1st. This with the reduction to be made to the Littleton Village District in hydrant rentals will reduce our income on water between \$4,000.00 and \$5,000.00.

We are trying hard to manage this department in a manner that will merit your confidence and be a source of pride to you.

Respectfully submitted,
F. E. GREEN,
Treasurer.

REPORT OF BOARD OF EDUCATION

To the Citizens of Littleton:

The school board herewith submits its annual report. The reports includes treasurer's report for the fiscal year July 1, 1931 to June 30, 1932 with an itemized statement of expenditures for that year; the budget for the present school year and for next year; statement of estimated receipts for these two years; and written reports by the superintendent of schools and by the headmaster of the high school.

We recommend that the school district raise the sum of \$63,000.00 for the support of schools for the school year beginning July 1, 1933. We believe this amount is necessary in order that our schools may be maintained at their present level of achievement.

In considering school expenditures please note the charts showing the payments made by the school district during the past ten years, and the decreasing debt.

Respectfully submitted,

Glenn S. Noyes

John M. Mathes

Harold J. Cooney

George A. Tewksbury

Raymond L. Giles

TREASURER'S REPORT

The regular audited report of the fiscal year as required by law, July 1, 1931 to June 30, 1932

RECEIPTS

Cash on hand, July 1, 1931	\$ 90.50	
Balance 1931 appropriation	70,000.00

SUPERINTENDENT'S REPORT

To the School Board:

I have the honor of submitting my second annual report relative to the schools in Littleton.

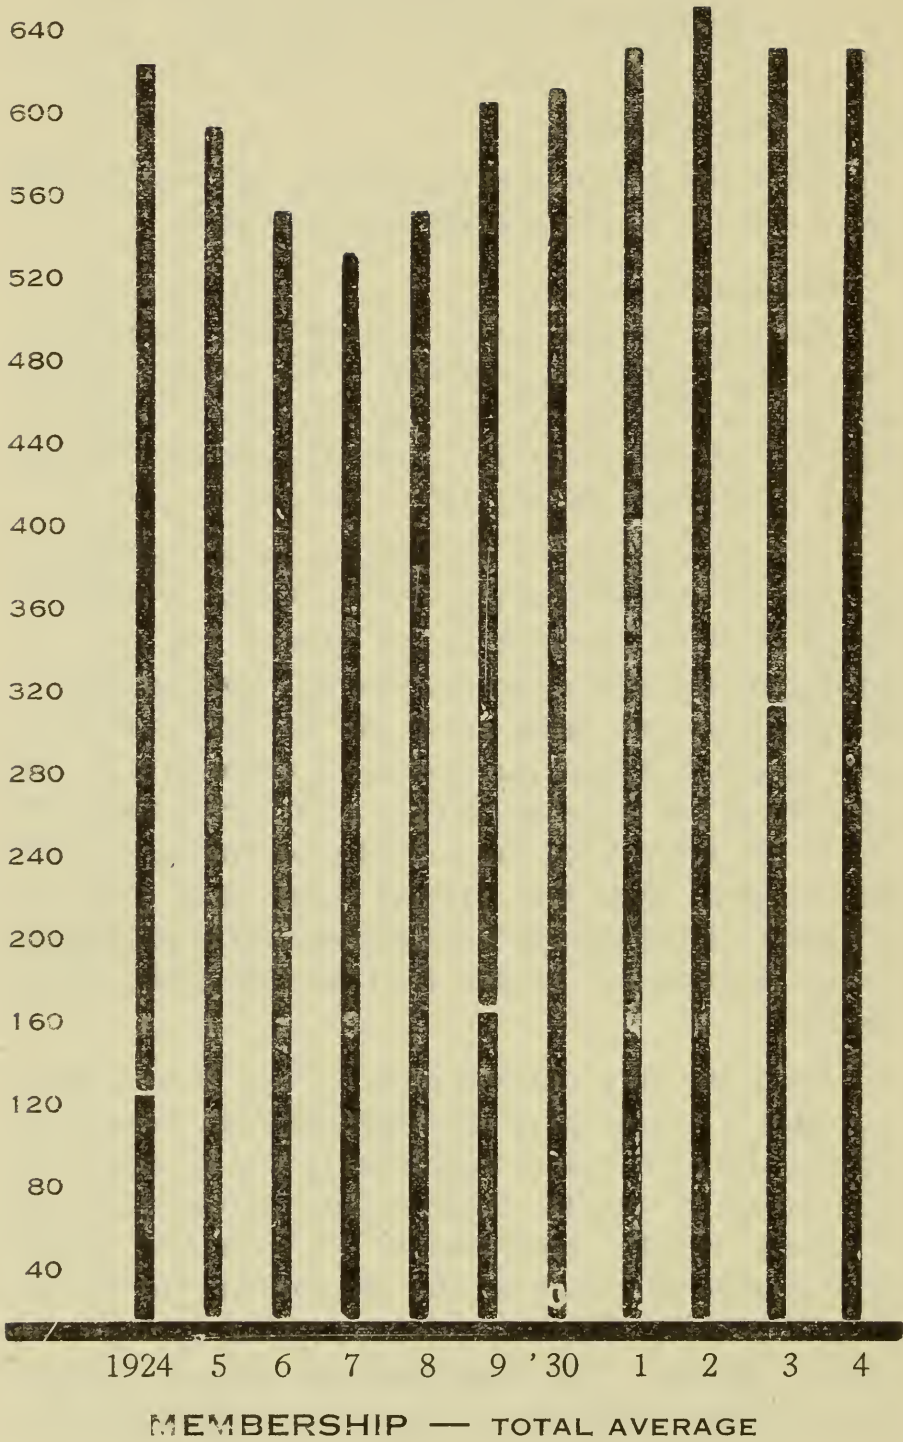

1. Attendance:

The total enrollment in your schools during the year ending last June was 697. The average membership was 635 and the average attendance was 601. The total enrollment in the high school was 230 and in the elementary grades 467.

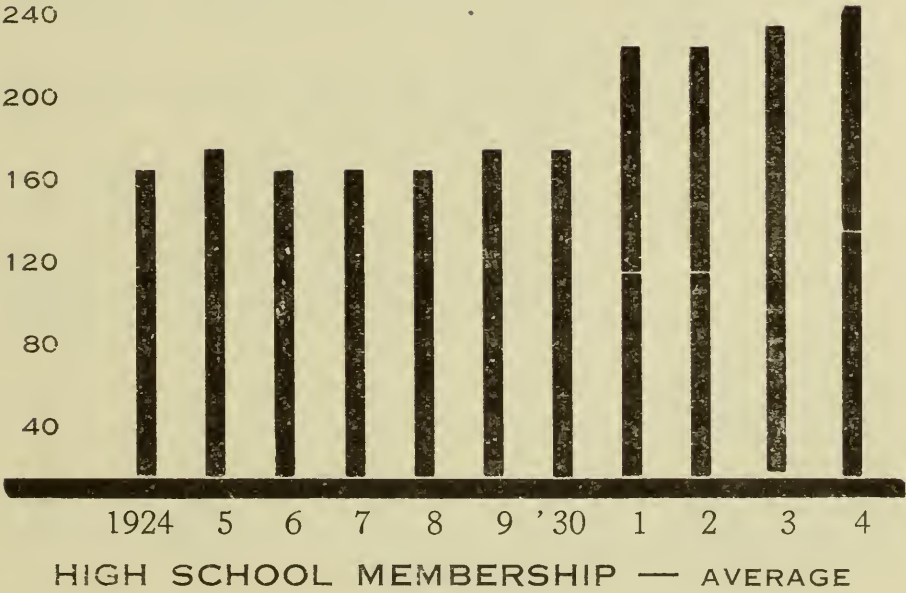

This year the total enrollment in all grades is 691 and the high school enrollment is 244. A study of figures in chart paragraphs on pages 106 and 107 shows that ten years ago the average membership in all grades was as large as it will be this year, probably larger, but that the average membership in the high school has increased 50 per cent during that period. If the figures for the school year ending in 1930 are compared with the present year they show an increase of 4 per cent in the membership in all grades and an increase of 38 per cent in the senior high school.

The story does not end here. There is no reason to expect a larger total membership next year than this but the high school membership will be larger by from 10 to 20 pupils. High school attendance has increased rapidly everywhere. Parents and pupils today realize the need of the maximum number of years in school. High schools are trying to meet the needs of pupils. The depression has created a situation in which the school presents the only opportu-

PUPILS

PUPILS

ity for useful occupation for young people. The result is that high school pupils complete their high school course and graduates return for additional courses. This is the situation that must be faced next year and for several future years, if not permanently.

The highest cost of instruction per pupil in the public school system is in the high school because of the variety of courses and the laboratory equipment and materials necessary. To eliminate any of these courses from the curricula is to remove the opportunity for high school education for a percentage of your young people. The responsibility of the public high school is to provide the opportunity for development of its pupils whether their need be in modern foreign language, in mechanic arts, in home economics, or in commerce. To accept this responsibility as efficiently and as economically as possible is the challenge of the citizenry of today if proper value is to be placed upon the citizenship of the next generation.

II. Health

The report of medical inspection for last year and of remedial work, and the medical inspection report for this year follow

Record of Medical Inspection and of Remedial Work for 1930-1931

Medical Inspection for year 1931 - 1932				
<i>Defects</i>	<i>No. of pupils affected</i>	<i>Pupils receiving treatment</i>	<i>Number defects corrected</i>	<i>No. of pupils affected</i>
Underweight 10%	102	25	25	263
Defective vision	22	21	16	55
Defective hearing	11	7	4	2
Nervous condition	1	1	1

Deformity	8	8	4	
Defective teeth	244	104	104	241
Diseased tonsils	44	34	34	34
Enlarged glands	16	10		15

Clinics held—Tubercular 1.

The remedial work accomplished this year and in past years is due to the interest of the school physician and school nurse in the health of the pupils. The school is also indebted to the Littleton Hospital and the physicians in the community who gave their services for the throat operations. Health and physical education are important influences in effective school work. They are bound to become more definitely a part of educational endeavor in future years. Outdoor games and games in the high school gymnasium under the supervision of teachers have been stressed during the past year to the physical advantage of a large number of pupils.

Instruction:

The greatest factor in the establishment and maintenance of good schools is in the securing of successful teachers. Education moves forward. The past decade has seen marked progress in the work of teacher training institutions, in the personnel of the product as a group, and in the professional endeavor of teachers. No profession is accomplishing more in research, in professional literature, and in effective organization than is the teaching profession. The length of the normal school term is being extended, certification requirements are becoming greater, and summer school attendance is becoming more common. A surplus of teachers exists today throughout the country but a surplus of well trained, highly efficient teachers does not exist even though a few such persons may be without permanent positions.

To improve the instruction in a school system is the superintendent's greatest responsibility. To organize, to deputize, and to supervise are said to be three essentials of supervisory work. In attempting to do this work successfully I have been deeply grati-

fied with the earnest cooperation of all members of the school board.

Several changes have occurred during the past year in the staff of teachers. I am much pleased with the morale and with the evident effort of the individual teachers. The teachers with several years of experience in the employ of the school district have been very helpful in my endeavors for organization and supervision. The new teachers have shown ability and enthusiasm in undertaking their duties. In selecting new teachers I have placed emphasis upon scholarship, training, and personality. Miss Ellen Kellogg, a graduate of Middlebury College in the class of 1931, where she had the highest scholastic rank in her class, with a year's study in France, was selected to teach French and Latin in the high school. Miss Lila Davis of Whitefield was selected for the English department in the high school. Miss Davis graduated from Plymouth Normal School, taught English successfully for three years in the junior high grades at Ashland and Exeter, and received her bachelor's degree last June from the School of Education in Boston University. Miss Arlene Silsby, Miss Elizabeth McLaughlin and Miss Billie Pennock, all high ranking scholars in last year's class at Plymouth Normal School, were selected for elementary grade positions. Miss Catherine Shea was transferred from North Littleton to the Apthorp School and made principal of the building. Miss Helen Tyrrell, a graduate of Keene, with a year's experience, was selected for the Pattenville School. All of these young ladies are doing well in their respective positions.

Of the teachers in the high school building three have a master's degree, four have a bachelor's degree, and all of the others have had summer school courses in addition to their normal school training. All of

the twelve elementary grade teachers in the other buildings are normal school graduates and six of them have had additional summer school courses.

To say that the instruction your pupils receive in all of your school buildings and in all departments of work is good is a conservative statement. In many cases superior work is being done. All of the teachers on the staff are earnest and professional in their endeavors.

Teachers' salaries are receiving much attention at the present time as are all school expenditures and expenditures in other units of government. In Littleton the average salary of teachers has been low in comparison with progressive towns and cities elsewhere, and all costs of instruction have been low. Instructional costs including teachers' salaries, text books, scholars' supplies, and other expenses of instruction tabulated by the research department of the National Education Association for the school year ending in 1931 showed the following:

Cost of instruction per pupil—average attendance:

Continental United States	\$62.56
State of Connecticut	78.39
State of Massachusetts	79.30
State of Rhode Island	68.24
State of New Hampshire	62.92
In that year — Littleton	58.92

The figures were procured from the state department of education in each state and were for all public schools in the state. Thus the cost of instruction in Littleton was considerably below the average in our own state and far below the average in the other New England states to which we lose many of our best experienced teachers.

In consideration of the comparative data presented, to reduce salaries at this time is to endanger the loss of some of our best teachers to other school systems in which the salary scale is somewhat above ours and in which some vacancies will occur. To reduce the number of our regular teachers is impossible as the teaching load—number of pupils per teacher—is already above the average recognized as desirable for the best accomplishment. The enrollment and number of teachers in each building are as follows:

High School, 6 grades, No. of Pupils 316, No. of teachers 11.

Kilburn, 6 grades, No. of Pupils 199, No. of teachers 6.

Apthorp, 8 grades, No. of Pupils 158, No. of teachers 5.

Building Improvements:

The following improvements have been made in the school property during the past year. At the Apthorp School the roof was shingled. The corridors and four classrooms were painted. New lights were installed in all rooms used. New radiation was placed in two rooms. All of the school furniture, pupils' and teachers' desks were refinished. Thirty-five desks were taken from the attic of the Kilburn building to replace the worst at Apthorp. The furniture and blackboards were moved from one room upstairs to one of the unused rooms and the front end of the building was shut off from the rest of the building to save heat. More sunshine and more economical heating have resulted. The Apthorp building is now in much improved condition.

The interior of the Pattenville building was painted and the roof and chimney were patched. The

school furniture at North Littleton was moved to the Pattenville and other buildings.

The other marked improvement made was in the grounds at the Kilburn and high school buildings. This improvement is evident to all who pass these buildings. Rocks were removed and covered, the ground was plowed and rolled, and about 140 tons of cinders were spread over the surface and rolled with the steam roller. Loam was spread over the upper ridge and this section was seeded. The rains and snow have made over all a hard, smooth surface, entirely free from mud. The playground for the children has been much improved.

The school district is indebted to the selectmen for free labor provided at the school grounds. This provision for labor was part of the town's program to offer made work to the unemployed.

The above improvements together with the other necessary minor repairs have cost the district a little more than \$2,000. That is one per cent of a reasonable valuation of the school property. One per cent of the valuation is considered a normal expenditure for the upkeep of school property. It is more than will be needed on the average for the next period of five or ten years in your buildings. The improvements made this year were seriously needed and the total cost for the work done was exceptionally low. Only in a period of severe depression could as much have been done for the expenditure.

The improvements recommended for the next year include the painting of the exterior of the Kilburn and Apthorp buildings, the painting of two rooms in each of these buildings, the installation of lights in the basement of the Kilburn building, and minor improvements in the high school building.

The estimate of the committee on repairs for these improvements and for the unforeseen expenses and cleaning is \$1,500. This is only 3-4 of one per cent of the valuation of the school property. While the effort to reduce school costs has been and should be positive, to delay much needed repairs seems unwise when the cost will be much less this year than at some future time. A program for repairs and improvements involving an expenditure of not more than \$1,500 for each of the next five years is a wise policy.

Finances:

For the school year ending in June 1932 the district raised \$74,000. That school year began with a deficit of \$3,909. The itemized payments for that year are shown in the report. It should be noted that about \$2,600 was paid for insurance, nearly all of the premiums becoming due. All current bills were paid and the deficit reduced by \$808.

The request a year ago was for \$72,000. The request was made in good faith by the school board based on a carefully prepared budget. \$70,000 was raised by the school district. The North Littleton School was closed this year by vote of the school board, making a saving of about \$2,000. The entire transportation expense for this year including the transporting of the pupils from North Littleton to the village will be less than for last year. With these and other economies the present school year will close with all current bills paid and with a reduction of the deficit by more than \$1,500.

The request for the next school year is \$63,000.00. This is \$7,000.00, or 10 percent less than was raised last year. It is \$11,000.00, or nearly 15 percent less than was raised two years ago. If this

request is granted it is expected that the work in all departments will be carried on successfully during the next school year, that the deficit will be paid, and that the planned building improvements will be made. Salaries will have to be reduced somewhat in order to meet the demands of the reduced budget.

This request for \$63,000.00 has been approved by the selectmen of the town and by the special finance committee appointed by the selectmen to study the budgets of all units of government in the town. It deserves the support of all interested in education.

Littleton claims the distinction of being one of the most progressive towns of its size in the state. The education of its youth is its greatest asset. It has an excellent high school building and good buildings for the pupils of the elementary grades. The peak of its educational costs has been reached unless the town has a decided increase in school population. The cost for bonded indebtedness decreases slightly each year. The sinking fund will pay the notes of \$25,000 during the coming summer. The school district is in excellent financial condition considering the property owned.

The school costs in Littleton are below the average for the state whether measured on the basis of equalized valuation or on the cost per pupil in average membership. These are the two bases commonly used. The medium cost per thousand dollars of equalized valuation for the school year 1930-31, in the state as a whole was \$10.32, while the cost in Littleton was \$8.90. The total current costs per pupil in average membership for the state as a whole was \$91.51 and in Littleton it was \$89.37. In 1951

only 22 towns of a total of 211 in the state spent more money per scholar than Littleton.

Tables showing the per pupil costs in public high schools and in public elementary schools in the state for the school year ending in June 1932 are available at this writing:

Public High Schools of New Hampshire:

Median cost	\$118.51
Littleton	107.56

Public Elementary Schools:

Median cost	82.11
Littleton	85.58

These figures for the last school year show that the per pupil cost in our high school was less than in a majority of the high schools of the state while the per pupil cost in our elementary grades was slightly above the median cost for the 242 school districts of the state. In connection with these figures it should be noted that the total cost in Littleton last year was much higher than this year and much higher than is expected for next year.

Your careful consideration of every suggestion for improvement in the school system—in organization, in teaching personnel, and in the improvement of school property—has been very encouraging and very helpful. No type of public service is more in the spotlight at the present time than is educational service. No expenditure for public service is being studied more carefully by all citizens than is the expenditure for education. The most careful supervision of expenditures is necessary. You have exercised rigid economy with proper consideration for the welfare of Littleton's future citizens. To you I extend my sincere appreciation.

Respectfully submitted,

DANA S. JORDAN

THE HEADMASTER'S REPORT

Dear Superintendent Jordan:

It is a pleasure to submit to you my second annual report, for it is now possible to give one covering a full year. Since last winter, we have been able to initiate some of the phases discussed last time, and to promote desirable features already a part of the school's program.

You have succeeded in securing a staff of teachers of high standing in personal example, teaching efficiency, and educational spirit. All are eager to maintain worthy goals of accomplishment, in character, in social contacts, in scholastic attainment, in mental and physical health for pupils in this high school. Littleton has reason to be proud of its classroom teachers and my hope is you may succeed in persuading the members of the staff to remain here, not seek other positions in large systems or at increased salary levels. This is perhaps too much to hope, but when the positions of those who may leave are filled, it will be a delight to work with men and women as eager to serve youth, and as sincere in purpose as teachers we now have. If you can select such persons, the quality of work will not suffer.

It has been customary to hold a Senior Class trip to the Nation's Capital. Our problem last spring was to secure the maximum educational values from such an excursion for the money spent. A few fundamental principles are involved in this. (1) Pupils should share actively in planning the trip. (2) Money

for expenses should be furnished mainly from parents. (3) The Class should not seriously compete in business ventures with those who support the schools. (4) The ones in charge of the pupils should feel the utmost responsibility for the comfort, safety, and experiences of the young people. (5) Guides should be procured who have a real knowledge of the points of interest. Probably no chaperone making only an annual visit to some of the cities in the itinerary, can explain all the new developments. Someone close to the scenes and who has almost daily experience in guiding groups should be secured to tell pupils much of the information they should obtain. (6) Considerable value of a trip is lost when people are crowded into tight compartments for long distances, with little opportunity for recreation through games, or relaxation through reading. (7) If all are to be kept well and happy during the tour, a diet from box lunches or from five to ten cent servings at one-arm eating houses cannot profitably be substituted for meals served regularly, with time to eat them properly, with portions sufficient to last to the next meal without continual nibbles on hot dogs and sweets. (8) Upon the return to town, pupils should permanently fix memories of the desirable experiences of the trip to Washington by speaking before groups of parents, schoolmates, and organizations.

A private car on the railroad for day-travel and reasonable hotels furnishing well-balanced meals and comfortable quarters for overnight stops were chosen in preference to crowded buses and to some haphazard plan of food-getting.

Pupils who turn into a class treasury a small amount as dues each year, who promote socials occasionally and use the profits to add to the class

finances, who hold food and candy sales to earn money, should not be asked to spend all to provide a free dance to Seniors and to adults who may be invited. The Juniors charged admission at the Prom last spring, using invitations stipulating a fee. The Seniors were guests, entering without charge. Most of the expenses of the Prom were paid in this way.

Seniors who are being graduated hold fond memories of their exercises only when the occasion lends itself to solemnity, sincerity, grace, devotion, and appreciation. The less serious parts of the commencement were held in a farewell assembly, somewhat in the nature of a class day but with the program given in the Auditorium.

The graduation program was developed with the theme: "The Aims of High School Training." Seven members of the class spoke on the points of health, citizenship, fundamental processes, worthy home membership, use of leisure, vocations, and character. Music was furnished by our Glee clubs and orchestra. Our pupils directed much of the work for graduation and endeavored to give to parents, friends, and citizens an insight into some of the factors which the modern school is endeavoring to attain.

"Business is good in the schools." While there is curtailment in many lines, each year more and more pupils register in our school. Since September 315 pupils have enrolled in Grades VII-XII, and there are available 315 fixed seats and desks. If no pupils had withdrawn, every seat and desk would have been taken.

The growth in total enrollment has been steady.

<i>Year</i>	<i>Grades VII-VIII</i>	<i>Grades IX-XII</i>	<i>Total</i>	<i>Specials</i>	<i>Total Enrollment</i>
1926-1927	71	171	242	1	243
1927-1928	59	172	231	0	231
1928-1929	57	182	239	0	239
1929-1930	72	192	264	0	264
1930-1931	64	222	286	1	287
1931-1932	75	227	302	3	305
1932-Jan. 1933	71	229	300	15	315

To these figures should be added 64 pupils from St. Rose of Lima and Apthorp Schools, who have work in cooking and sewing, and manual training.

The dearth of positions in stores, shops, hotels, offices, and other places of local employment, together with lack of funds for post-secondary training has brought 15 post-graduates to our school. No graduates are allowed to re-enter without their statement of sincere desire to make real progress in some school subjects, of their decision to abide by necessary regulations, of their willingness to be of some service to the school. A classroom is no place in which to loaf. The school should not furnish roof and heat for those without purpose. The staff has all it can do without wasting time on triflers.

A beginners' typewriting class for these older pupils has been organized, taught by one of our most competent seniors in commerce. Some have enrolled in bookkeeping, chemistry, French, home economics, mechanic arts, office practice and shorthand. Some carry assistants' duties and aid teachers in various ways. A few of the boys have a basketball team. Generally, these pupils are making measurable progress and are of service to the school.

Leadership can be developed successfully only by active participation in group activities. The sense of responsibility comes to a pupil only when some worthwhile project is being developed towards which

the boy or the girl makes some contribution of thought, energy, and resources. The joy of achievement comes from the accomplishment of a personal goal, from the satisfaction of a task well done, from sharing in a group project.

Pupils are being given a chance to lead, create, promote, and engage in activities which tend to make them useful members of society; 161 are recorded in football, basketball, or baseball groups; 35 are in winter sports, skiing, snowshoeing, ice hockey; 27 are on the "Record" staff; 87 are officers of classes, clubs, or members of committees for socials, assemblies, parties, and programs; 84 have taken part in assemblies; 174 play in the orchestra, took part in the operetta, or sing in the glee clubs; 198 belong to high school clubs or associations; 97 are assistants, caring for attendance, office, courtesy to visitors, ventilation and lighting, supply room, athletic equipment, fire squad, cleanliness, auditorium, and shower rooms.

Pupils promote clubs and programs outside the school. Our records show 282 pupils are enrolled in the Grange, DeMolay, Boy Scouts, Girl Scouts, Outing Club, Pecketts' Ski Club, 4-H Club, Town Band, Knights of King Arthur, Epworth League, White Mountain Y Club, St. Rose of Lima Glee Club, Young People's Society, and Standard Bearers.

We hear much about technological unemployment, the "stagger-plan", shorter hours of labor, the thirty-hour week, daylight saving, Sunday sports dance marathons, ballyhoo advertising, cheap movies, inexpensive radios, dime novels, tabloid newspapers, crime waves, church non-attendance, more miles per gallon, fewer "coughs in a carload", automobiles' death toll, and "taken for a ride". With fewer hours

of labor needed to give every man, woman, and child in the country the necessities of life, with the attitude of employers towards child labor, with the increased time available for each person to do as he chooses, the schools face the problem of preparing young people to use wisely their leisure. This problem is emphasized in the items given in the opening sentence of this paragraph. We are trying to face this situation and, aside from regular school studies and customary sports, assemblies, dramatics, and music, we are encouraging boys and girls to participate in group projects. One of these is the rifle club, enrolling 24 boys. They meet Monday evenings in the rifle gallery constructed in the cellar, walled in by concrete. Another is a sewing club in which 37 girls are members. This group meets on Thursday afternoons at 4 p. m. A committee serves light refreshments. A third is the hockey team, taking boys who do not play on the basketball squad. A schedule with Groveton, Lancaster, Whitefield, North Woodstock, and Woodsville has been carried out. The coach of the Blackhawks Team has assisted us in this venture.

A planned leisure-time program for young people in the community would be ideal. In the meantime, we must conceive activities which engage the interest of adolescents and which they will continue as hobbies in their moments of freedom from work.

Many boys of junior high school age desire to engage in athletics but are too small, as a rule, for players on high school teams. To keep their interest keen in sports and to give them a chance to play games when they might otherwise be walking the streets, the gymnasium has been used Saturday mornings for three different groups. At nine o'clock

the west entrance has been unlocked and a group of boys allowed to use the dressing and shower room to don basketball togs. At 9:45, another group has come, and the first took showers and left. At 10.30 the Boy Scouts were admitted. On occasion, games were held. The coaching was conducted by volunteers from the first string players on the high school squad.

Football, basketball, baseball give opportunities to train boys and girls in clean sportsmanship, courtesy, respect, co-operation, loyalty. These sports make chances for leaders to develop by actual experiences as captains, managers, scorers, and assistants. They furnish outlets for much youthful energy. Directed by coaches who exemplify clean daily living, they form one of the character-building agencies of the school. To win in fine spirit and to lose in good grace, to play for the sake of the game rather than solely for winning, to give commands and to execute directions are desired outcomes for athletics. No matter how the scores stand, it is with pride the report can be given that our boys and girls, with few exceptions, live up to the letter and spirit of athletic rules. Our young people do not "break training" when the season in a sport ends, but rather keep "in training" to be fit to play on the squad for the succeeding sport. Being an athlete in this school means clean living all the year.

The only problem present in promoting an athletic program is one of finance. It has not been possible for some time to adequately meet expenses. The White Mountain League is considering drastically reducing rates for officials. Either meet expenses or discontinue athletics is the situation in several schools, and our athletic department is keeping equipment bills to a minimum. If the public attends

our contests, whether we have a winning or a losing team, it may be possible for the sport program to pay its way. It is lamentable that money problems have to influence to such an extent our character-building activities, but such is the case.

We have much to be grateful for in the assistance we receive from citizens and firms. We did not fully realize how much service Mr. Herbert H. Downing rendered our school in the football season until his accident. He has always given freely of his time to keep the playing field in shape and to officiate efficiently at our games. He has been a fine example for our boys.

Any injured players have been promptly cared for at the office of Dr. A. T. Downing. He has given the boys and coach every service without charge. The assurance that any athlete needing competent medical attention at any time can receive it without hesitation at Dr. Downing's office has been a real comfort.

We are grateful for the courtesy these two brothers have extended and the services they have rendered.

There are other men who have assisted in various ways and who realize that helping youth unselfishly is a service more adults should render. In this connection, it might be expressed that as parents and adults, we are apt to be mainly concerned with worldly affairs, giving little thought, energy, or support to our boys and girls in their play, work, and social activities. We express many "don'ts", and fewer "do's". People soon forget how much money we willed upon our demise; they dismiss casually our interests as a property holder; they remember what we did for others; they remem-

ber the good things and the bad. Land, money, political power are as grains of sand beside the memory monuments set up by young men and women in appreciation of the service we have rendered them as advisers in their community organizations, as promoters of their social lives, as counselors in their ventures, as players and workers side by side in their developing lives.

Young people are appreciative. As parents, we have made them what they are. They may not express themselves so profusely over one small service we render, as we hear youth may have done twenty-five years ago but we have made them that way. We have given so freely they now expect to receive much, but that is not their fault. We gave first, they asked little. They took what we gave. If they seem to be less appreciative it is because we have accepted their quickly expressed thanks without helping them understand a deeper appreciation.

For the good things or the bad we render, youth sets up a memory monument. Its size is measured by the service we give and by the force of our personality upon their lives as we show them the finer spirit of appreciation.

On Monday mornings more pupils are tardy than at any other time in the week. Some homes apparently cannot become adjusted to starting the school week promptly. However, pupils are more punctual than they were last year at this time, a point of encouragement.

From Sept. 1931—Jan. 29, 1932, Grades IX-XII, 2.4 tardy marks per pupil. From Sept. 1932—Jan. 27, 1933, Grades IX-XII, 1.15 tardy marks per pupil.

Over 50 percent reduction

Last year, in comparison with other high schools in the State, our tardiness record was very poor. This year our rating in punctuality should show improvement; eventually, our school should reach a satisfactory position in this respect.

Punctuality is a virtue. The habit of being on time for school, for work, for appointments, is one well worth developing. The school is a training ground for youth and should use its influence to inculcate desirable habits, one of which is punctuality.

Littleton High School is destined to occupy a larger part in community affairs. Its staff members are willing, enthusiastic, loyal workers; its scholastic standing before post-secondary institutions is unquestioned; its leisure-time program starts to solve the problems arising from fewer working hours per week; its post-graduate enrollment indicates a future trend in continuing education; its sports program aids in character building; its assemblies, parties, clubs, assistantships, develop leadership; its activities command the respect and aid of business and professional men and women locally. Ours is a forward viewpoint.

Very sincerely,

DONALD P. MATTOON

Adult books lent	37,570
Juvenile books lent	14,915
Magazines	

4029 lent, average of $13\frac{3}{4}$ a day.

Largest circulation for one month, March	4,893
Largest circulation for one day, Saturday, February 27,	425

In common with libraries throughout the country, Littleton Library has shown a great increase in the use of its books during the past year. On an appropriation reduced by three hundred dollars, 20,000 more books were lent than in the year 1929-30, 10,000 more than in 1931-32. Since the cost of books has not decreased, the library has met increased

demands with smaller funds by certain economies: special care in the kind of bindings purchased; buying certain types of books only when they have come out in reprint editions — about one half the original cost; borrowing from the State Library, the Public Library Commission and large libraries in the state, books of rather specialized nature use to small groups only.

Greater use of the books means necessarily greater wear and tear. Increasing amounts of the book fund must be spent on replacements and rebinding, limiting the purchase of new titles. Gifts of new books have been particularly appreciated this year. Voluntary services of school children interested in learning library methods have been of real value.

During the summer months progress was made in re-cataloging the book collection. In the spring term all English sections of the Sophomore and Junior classes in High School were given two class periods of instruction at the Library, in the general arrangement of the books and in the use of the card catalog and a few reference books. The increased amount of business and its accompanying routine has made impossible further work of this kind with the schools, which the librarian considers an important part of a library's service.

The library is looking forward to a useful, progressive year, whatever its financial resources, hoping to be better able to meet the educational needs of the town in supplementing the school work, and to satisfy the recreational and cultural reading demands of every member of the community. It is estimated that about one third of the town's population uses the library. The circulation is above standard (five books per capita) whether based on the entire population, 11 3-5 per capita, or on the actual number of borrowers, 35 per capita.

ELEANOR SHANE,
Librarian.

VITAL STATISTICS

for the year ending

December 31, 1932

To the Selectmen of Littleton: In compliance with an act of the Legislature passed June session 1877 requiring "clerks of towns and cities to furnish a transcript of births, marriages and deaths to the municipal officers for publication in the annual reports," I submit the following Vital Statistics.

I hereby certify that the following return is correct according to the best of my knowledge and belief.

W. N. HEALD, Town Clerk.

Births Registered in the Town of Littleton, N. H., for the Year Ending December 31, 1932

Date of Birth and Name of Child (if any)	Name of Father		Maiden Name of Mother	Residence of Parents	Birthplace of Father	Birthplace of Mother
	No. Living or Stillborn	No. of Child				
1931						
Jan. 28, Wallace Robert	M	1	Thelma L. Hartshorn	Littleton	Craftsbury, Vt.	Lunenburg, Vt.
Jan. 4, Mary Ann	F	12	Bertha M. Hall	Littleton	Brandon, N. Y.	Lynn, Mass.
Jan. 5, Richard Edmond	M	3	Gladys Guilmette	Littleton	Webster, Mass.	Bethlehem
Jan. 7, Margaret Ann	F	2	Frances Sullivan	Littleton	Melrose, Mass.	Everett, Mass.
